

## Consortia Support

Is your consortium operating to its maximum capacity?

Are you providing the best quality learning provision?

Do you work collaboratively to support continuous improvements?

Intraining Consulting has developed a unique support programme to assist Learning Provider Consortia to effectively manage and continuously improve the quality of the learning provision.

Our clients in the learning skills sector have already seen tangible and sustainable impact on their businesses. Such benefits include:

- Outstanding quality learning provision, leading to great success rates.
- High levels of satisfaction from staff, learners and employers.
- A consortium that works collaboratively to continuously improve quality.

- Effective management and quality assurance.
- A sustainable knowledge management process.

The support programme offers consortia the opportunity to access a combination of expert knowledge for the learning skills sector and our consulting skills, with the aim of delivering a solution that enables collaborative working, facilitates knowledge transfer and leads to real business results.

**Key aspects of the support programme**

Clients benefit from a structured approach that leads each consortium member through the following activities:

**Exploration;** a diagnostic exercise conducted with both the consortium lead and its members.

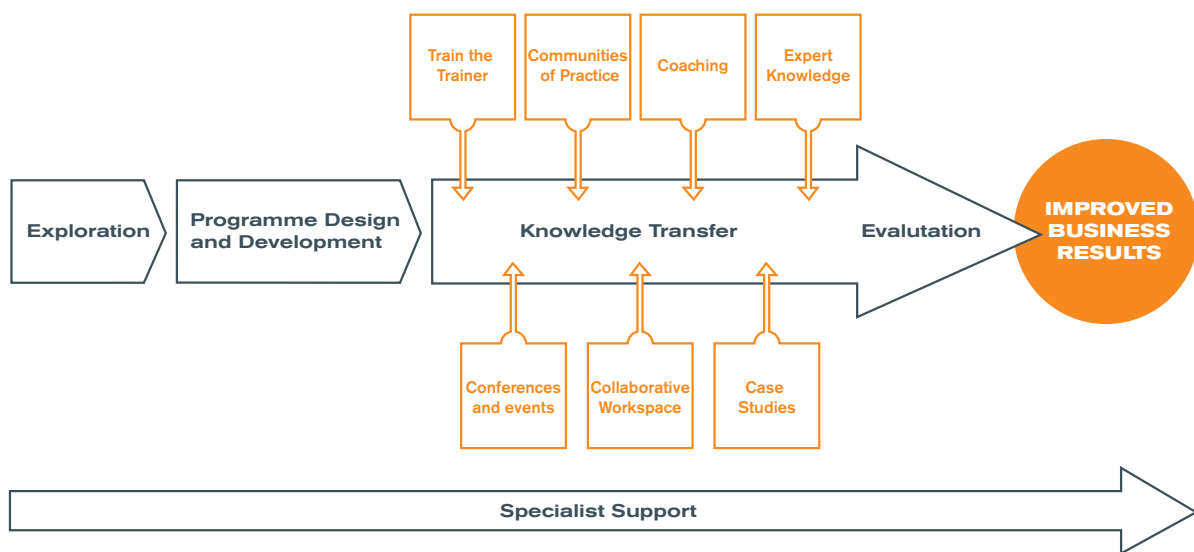

**Programme design and development;** a bespoke programme that meets the specific needs of the consortium to achieve agreed business objectives.

**Knowledge Transfer;** delivery programme using a range of interactive and innovative activities to achieve maximum impact and understanding.

**Specialist Support;** provide expert support to the consortium lead around key areas of provision management.

**Evaluation;** of all participating members against standards used during the exploration exercise and other sector benchmarks.

**Consortium Support Programme Process:**
